

Cheat sheet: Exceptions

Catching/Handling exceptions

```
try:  
    ...  
except EXCEPTION_CLASS:  
    ...  
except EXCEPTION_CLASS2 as EXC_VAR:  
    ...  
else:  
    ...
```

Raising exceptions

```
raise EXCEPTION_CLASS(MESSAGE)
```

Deriving user defined exceptions:

```
class MY_EXCEPTION_CLASS(Exception):  
    """Description of my exc... """
```

Stopping code gracefully

```
sys.exit(EXIT_CODE)
```

Testing on exceptions in pytest

```
with pytest.raises(EXC_CLASS):  
    ...  
  
with pytest.raises(  
    EXCEPTION_CLASS,  
    match="\"EXCEPTION_MESSAGE\""):  
    ...
```
